

Focus on

TRAINING

Cetim Academy®: train for the present, prepare for the future!

Industry 4.0 leads to far-reaching changes at all levels of the company.

Now more than ever, the identification of talents, the digitalisation of knowledge management and support to all employees have become key factors of successful transformation.

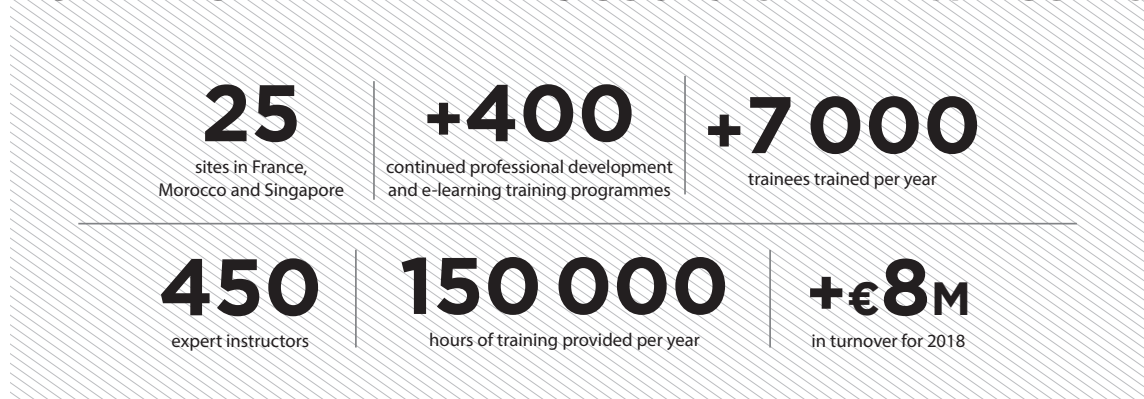

With its 450 experts and network of partners, Cetim, the Technical Center of Mechanical Industries, is your sole point of contact to develop and promote the wealth of human resources within your company.

With training centres located in France, Morocco and Singapore, the services provided through the Cetim Academy programmes are designed to **meet the training needs of all**

staff in order to keep up with management, technological and digital changes induced by the Industry 4.0:

- Proven engineering know-how, knowledge and expertise
- Innovative teaching methods based on working practices
- Qualification and certification training programmes, validation of acquired skills under the supervision of mentors
- Customised trainings available to meet your requirements in France and abroad
