ABOUT CADFEM

Founded in 2017, CADFEM SEA Pte. Ltd. is one of the pioneers of numerical simulation based on the Finite Element Method (FEM) and is a part of CADFEM International - one of the largest European suppliers of Computer-Aided Engineering (CAE), with Global Headquarters in Germany and Local Headquarters in Singapore. With 35+ years of experience, CADFEM has grown as a System house providing end-to-end simulation solutions including Software, Hardware, Consulting, Support & Training – All from a single source. For over 3 decades, we have represented **ANSYS**—the global leader in Engineering Simulation and served 2,500+ customers globally, the largest and the oldest channel partner of ANSYS in the world. With 1000+ CAE Experts globally & 30+ engineers, CADFEM SEA provides support for both industrial enterprises from any sector and of any size, as well as customers engaged in research, training and teaching. Moreover, CADFEM SEA is engaged in research projects and liaises closely with companies / academic Institutions in order to pave way for simulation in future fields of application.

Products

CADFEM offers a complete range of CAE software & hardware from leading suppliers-from individual components to customized solutions, ready for immediate use.

As the world's biggest provider of simulation software, ANSYS offers leading technology solutions for almost every CAE application in industry, research and academia. As a close partner of ANSYS since 1985, CADFEM sells the complete suite of ANSYS software including Motor-CAD, OptiSlang, LS Dyna, In South-East Asia, CADFEM is an ANSYS Certified Channel Partner.

CADFEM offers a diverse array of CAE products to simulate a wide variety of industrial applications. such as, Rocky DEM which expands its range of Multiphysics particle-dynamics simulation with improved integration features and models. This latest release significantly expands ANSYS CFD–Rocky DEM integration capabilities, increasing speed of the coupled solution.

CADFEM ANSYS Extension include integrated tools such as FKM, Bolt Assessment, Mold-sim & C.A.V.E. to provide added functionality to your usage of ANSYS software.

Services, Hardware & IT Solutions

We advice, accompany and support our clients in all matters – and with comprehensive services- so that they can reap the benefits of simulation.
