Automation & Information Solutions

Career Guide

CAREER OPPORTUNITIES

Are you passionate about solving real world complex problems? Are you results oriented? Do you like to work with people and travel? Do you want to make a difference from day one? If so, we would like to talk to you.

RoviSys is growing and we are always looking to add talented engineers and programmers to our team. We are filling full-time and internship positions for these roles

Systems Engineer

- ▶ Work with a talented group of people using the latest technologies to provide innovation solutions to our clients.
- ▶ Design and develop automation systems.
- ▶ Design and develop low to medium voltage plant electrical systems.
- ▶ Work in a team environment with engineers and designers from RoviSys, partners and clients.

Software Engineer

- ▶ Learn from seasoned software development professionals.
- ▶ Interview clients to identify and clearly document user requirements.
- ▶ Architect software solutions using the appropriate technologies.
- ▶ Develop quality code in accordance with established RoviSys and client standards.

Electrical Engineer

- ▶ Work with a talented group of people using the latest technologies to provide innovative electrical and control solutions to our clients.
- ▶ Design of control and power systems.
- ▶ Design and develop motor automation control cabinets.
- ▶ Work in a team environment with engineers and designers from RoviSys, partners and clients.

Internships

We are dedicated to helping students succeed by offering internship positions to allow them to gain valuable hands-on experience in the 'real' world before graduation, working side by side with seasoned engineers to complete software and process control systems projects.

HOW WE HIRE

NOW HIRING

Creative ideas and critical thinking are the driving forces of our growth. Our people are the backbone of the company, which is why we are actively on the lookout for people that are self-motivated with excellent communication, teamwork and technical skills.
