

Implementation Services

Overview

The Implementation Services Specialist of Temenos Banking Software.

We have been providing Temenos services to Banks & Financial Institutions for the past 15 years. This makes us the true Temenos banking software specialists with deep knowledge and expertise and long-standing experience. We place our clients at the core of what we do.

Syncordis' services span from implementation through to evolution and production support.

There are many good reasons why you implement or migrate to a new core banking system, private wealth management or any other banking software product. Digitalisation, greater efficiency, operational savings, global consolidation, lower infrastructure ownership costs, improved functionality, improved customer service to name a few.

That's why it makes sense to work with a Temenos services expert to turn your investment into future-proof assets that work harder for your customers, your people and your business.

Temenos offers core banking solutions, business intelligence, private wealth management, mobile and internet banking, and other complementary software applications to transform your business.

We at Syncordis know how to implement them, and we have the proven services to guide you expertly through a safe, predictable and successful implementation to the highest standard. First time, every time.

Service Offerings

Our implementation services aim to reduce cost and improve quality, ultimately helping our clients to add the value they provide to their customers. The scope of Syncordis Implementation services is as following:
