

Jerome Lua

Plant Operation Engineering

Joined in 2018 as a fresh graduate.

What made you decide to join Edwards?

As a graduate from Nanyang Technological University majoring in Mechanical Engineering, I chanced upon Edwards Lifesciences at the campus recruitment fair. I was intrigued by Edwards' contributions to patients around the world, hence, I applied for an engineering role.

Share your work experience at Edwards.

Being part of the Plant Operation Engineering team working on equipment maintenance, I ensure all equipment under my care run smoothly. When involved in improvement projects, I seek to enhance the reliability and processes of the equipment. These experiences enabled me to keep learning, especially with the help of a supportive team.

What project has left you with a strong impression?

As a fresh graduate, I visited our USA headquarters to support a new project and I was tasked to transfer an automated equipment from USA to Singapore. It was a challenging yet fulfilling experience.

Besides work, are there other activities you enjoyed at Edwards?

Within my first year in Edwards, I was given the opportunity to be a pillar lead for the Wellness, Harmony & Outreach Committee. This enabled me to expand my network in Edwards as I went on to plan for company-wide activities, such as Blood Donation Drive, Education and Financial Talks, and participated in Rise Against Hunger and Dinner & Dance events.

What keeps you motivated at Edwards?

Edwards' culture encourages holistic and continuous improvement which motivated me to work on new technological improvement projects to enhance the equipment reliability and in turn, support smooth manufacturing processes.

What made Edwards a good fit for you?

Edwards has a collaborative culture for me to work with cross-functional teams on various projects. For one of the projects that I worked on, I was tasked to review an existing equipment, where I had to work closely with both the Quality and Manufacturing Operations teams for successful conversion.

How have Edwards contributed to your career?

Edwards' Secret Sauce and Credo have inculcated values in my career, such as 'Dream Big' and 'Own Your Failures, Learn'.
