

Focus on FAILURE ANALYSIS

*More than a simple diagnosis,
failure analysis brings input to boost your competitiveness!*

The average cost of non-conformity to quality, which resulted in losses, waste, repairs and disruptions, has been assessed at up to 15% of turnover of most industrial firms.

Yet, only one in four companies truly understand the importance of **Failure Analysis** to help them reduce or eliminate such consequences!

Cetim and MATCOR are reputable with proven track records in **Failure Analysis** and **Forensic Engineering investigations** covering all industrial sectors. We are the independent specialist in ascertaining the root cause of failures to help you reduce **OPEX and CAPEX** by providing solutions to improve safety at your workplace, reliability and availability of your equipment and facilities.

With **Cetim** well established in **France** and **MATCOR** strategically located in **Singapore**, we are able to deploy our specialists promptly to answer your imminent needs World-wide.

Beyond diagnosis, our experts can support you right up to the **implementation of corrective or improved measures**.

Renowned to be :

- **Independent with Integrity**
- **Innovative with state of the art resources** such as 3D scanners, drones, robotics, digitalisation, 3D simulation, non-destructive testing, tomography etc ...
- **IIoT solutions provider** for residual life assessment, establishing predictive maintenance schedule, extension of life of pressured equipment and machineries, monitoring and providing innovative solutions.
