FUTURE IN YOUR HANDS

Test Engineer

TÜV SÜD – A global leader in the field of testing, inspection, management system certification and product certification renowned for quality, integrity and technical excellence.

We test, we certify, we audit, we advise. We never stop challenging ourselves for the safety of society and its people. We breathe technology, we strive for professional excellence, and we leave a mark.

#FUTUREINYOURHANDS

As a Test Engineer, you will assume an all-encompassing role that involves test engineering as well as customer, laboratory and people management.

- Perform tests to ensure that products and technologies are in line with safety, security and sustainability standards. Products may include:
 - Automotive and Industrial products and technologies (i.e. Industry 4.0, digital twins, robotics, drones, electric vehicles and its charging infrastructures, additive manufacturing, 3D printing)
 - Consumer products (i.e. wearables, gaming accessories and consumer lifestyle products)
 - Lighting products (i.e. LED lighting, emergency lighting and signages)
- Proactively collaborate with Business Lines to articulate new trends with clever solutions and market requirements
- Develop and commercialize new services or innovations
- Undertake projects on processes, operations or facilities improvements
