

Silicon Labs Corporate Overview

MAY 2020

The leader in silicon, software and solutions for a smarter, more connected world.

A leading provider of silicon, software and solutions for a smarter, more connected world

- Core competencies in mixed-signal and RF integration
- A track record of multiple industry firsts, transforming and disrupting large markets
- Focus on high-quality, diversified markets positioning us well for sustainable growth
- Scalable, fabless manufacturing model

FOUNDED IN 1996

LISTED SLAB

~35,000 CUSTOMERS

>1,700 PATENTS

REVENUE

2015, 2016, 2017, 2018, 2019 Most Respected Public Semiconductor Company Achieving \$500 Million to \$1 Billion in Annual Sales

A Global Company

HEADQUARTERED IN
AUSTIN

~1700
EMPLOYEES WORLDWIDE

INTERNATIONAL HQ
SINGAPORE

● R&D Centers ● Sales Offices

Leader in Silicon, Software and Solutions

MCUs | Wireless | Sensors

Secure wireless stacks
Embedded OS | OTA Updates

Modules | Reference designs
Cloud services | Tools

We provide significant advantages in performance, energy efficiency, connectivity and design simplicity.

- Diverse range of applications and customers
- Flexible hardware and software platform

We Believe in a More Connected World

Our technologies enable customers to transform industries and improve lives. Together, we are creating a smarter, more connected world that benefits us all.

A More Connected World is...

SAFER

Allegion's door locks enable delivery service access without homeowners needing to be on-site.

Zigbee

BRIGHTER

Yeelight's LED lightbulbs allow you to control lights with just the touch of your phone.

Bluetooth Mesh

HEALTHIER

Propeller Health makes it possible for asthma and COPD patients to better manage their treatment.

Bluetooth SiP

A More Connected World is...

DATA-DRIVEN

Highly reliable clocks and crystal oscillators service the backbone of the Internet

Timing

GREENER

Superior products reduce size and cost for electric vehicles and charging stations

Isolation

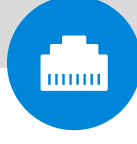

MORE INFORMED

Unrivaled, scalable approach for developing auto infotainment systems

Automotive Infotainment

A Diversified Product Portfolio

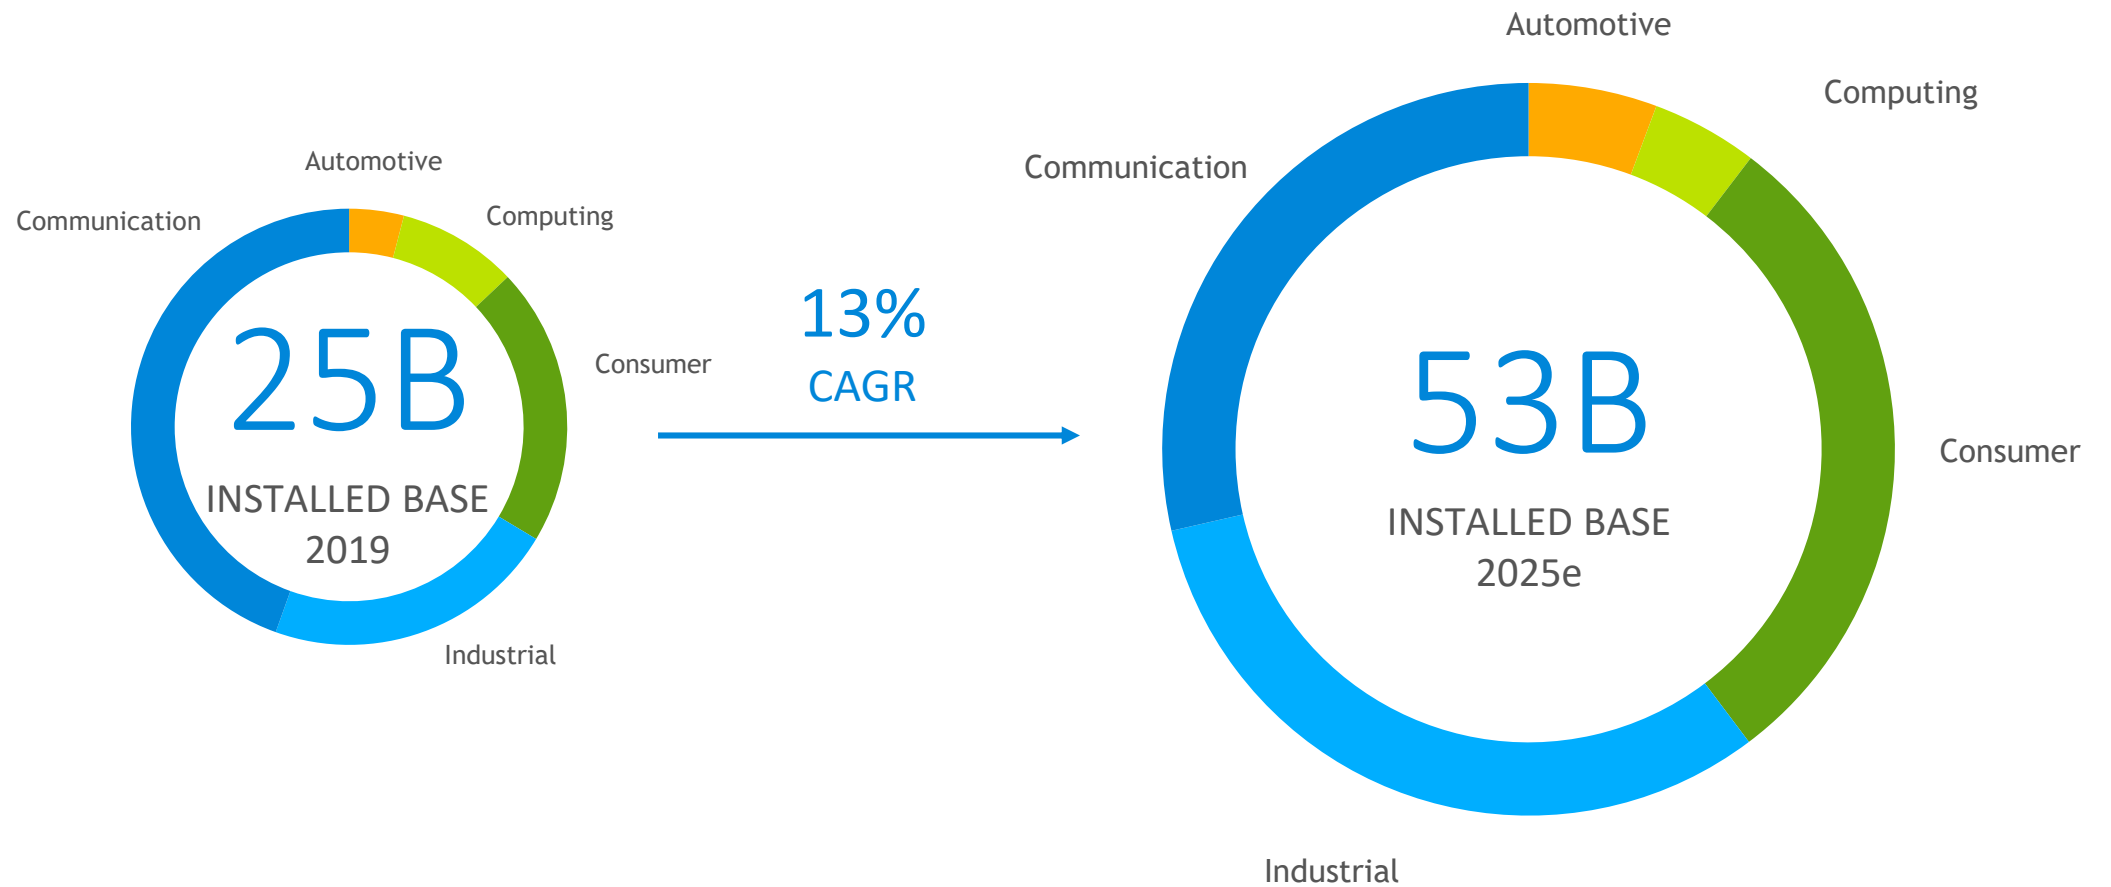

INTERNET OF THINGS	INFRASTRUCTURE	BROADCAST	ACCESS
			
			
MCU Wireless Sensors ~60% REVENUE	Timing Isolation ~20% REVENUE	Automotive Radio TV Tuners ~15% REVENUE	Modems SLICs PoE >5% REVENUE
HIGH GROWTH			MATURE

IoT Driving \$12.1B Opportunity Pipeline

- Total SLAB
 - Design-win lifetime revenue up >30% y-y
- Wireless solutions driving growth
 - >65% 2019 IoT revenue
 - Grew 14% in FY19 vs WSTS down 16%
- IoT growth drivers
 - Smart home & security
 - High volume lighting
 - Smart metering
 - Broad industrial market

IoT: Market Opportunity

Source: IHSM 2019 Q3

IoT: Leadership in Wireless Silicon, Software and Solutions

STRATEGIC GROWTH TARGET 20%

- Scalable hardware and software platform
- Provide complete solution from silicon to cloud
- Enable market-leading integrated security
- Broad offering of low-power SoCs
- Extensive wireless protocols including Bluetooth, mesh, proprietary, and Wi-Fi
- Simplicity to drive support leverage
- 1,000's of applications and 10,000's of customers

IoT: Executing a Platform Strategy

CUSTOMER REQUIREMENTS

High performance, reliable, maintainable

Easy to develop and deploy

Long life solution

WHY WE WIN

Best connectivity—RF SoCs and modules

Robust SW framework simplifies development

Upgradeable, cloud connected

We Address all Facets of the IoT

DEVICES AND SOFTWARE

Wireless SoCs and Modules

Superior RF performance
Multiprotocol | Robust stacks | Security

DEVELOPMENT TOOLS

Leading Tools

Fast time-to-market | Simplicity Studio IDE
Connectivity kits | Network optimization

SOLUTION

Silicon-to-Cloud

Complete solution | RTOS
Cloud connectivity

IoT: Solutions to Shorten the Path to Connectivity

STARTER KITS

Rapid prototyping

WIRELESS MODULES AND SIPS

Pre-certified, small footprint

APPLICATION EXAMPLES

Examples with source code for both SoC and mobile applications

Platform-based Edge Node Architecture

Developer Tools

Host Environment			Toolchains	Other		
Energy Profiler	Hardware Config	App Builder	IAR	Sample Applications	Precertification	MISRA, Static Analysis
Network Analyzer	Radio Config	Secure Programming	GCC	Mobile Apps	Large Network Testing	Documentation Application Notes

Connectivity Software

SEMICONDUCTOR PROVIDED			CUSTOMER IMPLEMENTED			Other		
							Coexistence	BR / Gateway
							Multiprotocol	Test Harness
RADIO ABSTRACTION LAYER								

Platform Software

RTOS	Core Platform			Drivers	Security	Utilities	Middleware		
KAL	Sleep	IPC	Memory	Micrium POSIX	Security Libraries	C-Lib, Diag, Stats, Error Codes, Assert	FS, IO	NCP, CLI	Cap Sense
Micrium Kernel	Timers	Events	System	EmLib	Secure Element		Bootloader	NVM	Graphics Lib

Hardware

Chips			Modules		Development Boards	
Secure MCU	Multi-protocol radio	Secure Element	Antenna Match	Certifications	Starter Kits	Reference Designs
eFlash/RAM	I/O, Interfaces	Power/Energy Management	PCB, SiP	Shield	Radio/Expansion Cards	Evaluation Boards

Infrastructure: Leadership in Performance and Integration

STRATEGIC GROWTH TARGET 10%

- Breakthrough architectures leading industry
- Timing: leading in core/metro and expanding into data center, wireless and industrial applications
- Isolation: replacing traditional optocouplers in power supplies, motor controls and green energy applications
- Long life, highly profitable revenue

Timing: Clocks &
Oscillators

Digital
Isolation

Low Touch
Easy to Design-in

Timing Portfolio

- Leading in core/metro and expanding into data center, wireless, industrial and automotive applications
- Patented technologies yield performance advantage
- Flexibility, programmability simplify design
- Oscillators deliver time to market advantage
- 9 of the top 10 telecom equipment providers rely on our timing solutions

XO/VCXO

Jitter Attenuating Clocks

Clock Buffers

Synchronization

Clock Generators

Wireless Clocks

Timing Opportunity

TELECOM

Increasing amount of data being transferred within / between cities, countries

DATA CENTERS

Pictures/video social media, cloud storage driving huge connected data centers

WIRELESS

Implementation of small cells, distributed antenna systems to increase coverage

Timing Performance Wins

CUSTOMER REQUIREMENTS

Faster data rates require higher performance

More features in a smaller form factor

WHY WE WIN

Industry-leading performance and flexibility

Provide complete clock solutions with
highest level of integration

Isolation Portfolio

- Replacing traditional optocouplers in power supplies, motor controls and green energy applications
- Patented RF, capacitive isolation technology
- Field proven, more than 1B channels shipped
- Best emissions, immunity performance
- Compact size supports shrinking electronics
- High-speed and tight timing improve efficiency
- #1 in digital isolation for electric vehicles, cloud and telecom power supplies

Digital Isolator

Isolated Driver

Isolated ADC

Isolated Analog

Isolation: Global Trends Driving Growth

GREEN ENERGY

Electric & hybrid-electric vehicles

Solar inverters & wind turbines

EFFICIENCY

Server, storage, networking power supplies

300M industrial electric motors installed

REGULATION

Governments issuing efficiency standards

Reduction in greenhouse emissions

Isolation Performance Wins

CUSTOMER REQUIREMENTS

Improve efficiency
Robust operation in noisy environments
Smaller PCB footprints

WHY WE WIN

Delivers faster switching times
Best-in-class noise immunity
Higher density and more integrated features

A Broad Range of Customers and Application Areas

We've shipped **more than 150 million** mesh networking devices

30 million hours saved yearly with smart metering applications

Boosted energy capacity by 6.8 MW in **13.8 million solar inverters**

We're in more than **1M EV/HEV cars**

We help coordinate **90% of Internet traffic**

On board 100% of cherry red electric roadsters currently **orbiting the sun**

High Quality, Agile Supply Chain

Partnering with world-class suppliers to manage products from development to customer delivery

- Reliable, responsive, high volume supply
- Support unexpected surges in demand
- Quality-centered assembly and test, dual sourced
- ISO9001/14001 certified and ISO/TS16949 compliant

ASE GROUP

20+ YEARS

OF PROVIDING SILICON,
SOFTWARE, AND SOLUTIONS

15 YEAR

TIER 1 FOUNDRY/
ASSEMBLY PARTNERSHIP

Innovation in Testing and Performance

CUSTOM TEST HARDWARE

Modular design so we can be responsive to changing requirements

FLEXIBLE CAPACITY

Custom design allows for rapid scaling and deployment

SMALL FORM FACTOR

A typical ATE is about the size of a car; ours is smaller than a shoe box

Key Take Aways

- Well positioned for leadership in IoT
 - Large, growing and diverse market
 - Leading hardware and software platform
 - Advanced capabilities in connectivity and security
- High quality Infrastructure opportunity
 - Addressing trends in data and green energy
 - Focus on communications, industrial & auto markets
 - Expanding SAM and portfolio
- Addressing a \$12.1B opportunity pipeline
 - >\$8B IoT opportunity
 - Double digit growth opportunity for IoT & Infrastructure
 - Total DW LTR up >30% y/y

Thank you
