INVENTING FOR LIFE

# GREAT MEDICINES CHANGE THE WORLD GREAT MINDS MAKE IT POSSIBLE

Join the quest to cure

## Work with purpose

We pursue cures to the leading health challenges of each new generation.

Through the creative energy of some of the world's finest minds, we have developed solutions that are transforming lives in new and promising ways. Globally. By the hundreds of thousands.

Our culture is one of applied inquiry, where the drive to invent transcends geographies, disciplines, and experience levels — on behalf of humanity. We work with purpose, knowing that every scientific breakthrough has the potential to make a lasting impact on people's health, well-being and welfare.

It's about living our mission on a daily basis: To make a difference in the lives of people globally through our innovative medicines, vaccines, and animal health products.

At the MSD Manufacturing Division, we offer a wide range of pharmaceutical career opportunities from research and development and business technology to manufacturing operations.
