

netvirta

NetVirta is a 3D scanning-as-a-service company that enables brands and retailers to seamlessly and cost effectively offer their customers a personalized buying experience.

Through integration of Verityt, our precision 3D scanning app and cloud platform, users are able to 3D scan a part of the body with medical-grade accuracy (± 0.5 mm), all in less than 1 minute. Whether its suggesting the best fitting clothing/shoes, or offering custom-fit products, we view 3D scanning as the future of the customer buying experience, both in-store and at home.

Custom Fit Products

Scale your custom-fit offerings by streamlining the fitting, ordering, and manufacturing process

Flawless-Fit Recommendations

Minimize returns & exchanges by leveraging customer's 3D models and measurements to suggest the best fitting size or style
