

ABOUT US

We are an SAP focused, international IT consulting business with offices in Singapore and Malaysia, and representation in Japan, Germany, and the UK. We offer industry expertise and technical solution know-how across a range of SAP solutions – from ERP to CRM. As part of United VARs, we are a Platinum Partner and thus support our clients in all areas of SAP software

Our customers are as diversified as the industries that we serve. From small, local SMEs that start off on their journey with their first ERP solution, to Fortune 2000 companies with a worldwide presence, whom we help rollout out SAP solutions across the globe.

Our mission is to help businesses identify and deploy leading-edge technology solutions, and successfully execute digital transformation projects, arming them with the technology that enables them to run simpler, faster, and with more insight than ever before.

We pride ourselves on our processes, craft, and expertise across the technology space. We offer a range of services from strategic consulting, technical development, implementation, and support.

If you have a business challenge that can be addressed through technology, we believe we can help.

4. SUPPORT

We have a dedicated and certified SAP CoE (Center of Expertise) that supports SAP customers across Asia. Our team of SAP S/4, SAP ECC, Business One and C/4HANA support experts provide first and second level AMS support, continuous enhancement and staff augmentation services. As a leading SAP Support Organization, we help you to stay abreast of the latest developments, assist you with desired enhancements, and keep your systems running, whether on cloud or on-premise.

SERVICES

1. STRATEGY

A digital transformation journey can be complex and difficult – but doesn't have to be. Our team of management consultants will help you to simplify the complex, and break down your journey into manageable steps. In order to help align business direction with IT capabilities, we help with initial IT assessments, development of the desired "to-be state", Roadmap Design, RFP creation, and software evaluation.

2. IMPLEMENTATION

We are one of the leading SAP Partners in Singapore and a global SAP Platinum Partner. Our team of experts has helped customers across Asia since 1997 to implement SAP solutions – from R/3 to S/4. Our customers are in all private sectors and range from small local businesses implementing their first ERP solution, to truly global MNCs with thousands of SAP users and decades of internal experience.

3. ROLL-OUT

Our global network of partners, coupled with our expertise in implementing SAP solutions across Asia made us the perfect fit for organizations looking for an experienced SAP Roll-out Partner. We understand the local challenges and legal regulations, and we understand how to address them and mitigate implementation risks. Our global rollout methods, our ability for local support, along with our understanding of different cultures allowed us to successfully roll out many SAP projects over the years for our customers.
