## Cyber Security Test Engineer (Intern)

TÜV SÜD – A global leader in the field of testing, inspection, management system certification and product certification renowned for quality, integrity and technical excellence.

We test, we certify, we audit, we advise. We never stop challenging ourselves for the safety of society and its people. We breathe technology, we strive for professional excellence, and we leave a mark.

#FUTUREINYOURHANDS

As a Cyber Security Test Engineer, you will delve into the functionality of cybersecurity products. You will gain a comprehensive understanding of international standards and certification process, particularly in IEC 62443, and perform testing on cyber security products.

- Perform cyber security hands-on testing on IOT products and evaluation of product development lifecycle process
- Prepare configuration for communication module and vulnerability evaluation tools
- Derive conclusions from testing results relating to the functionality
- Perform product development lifecycle analysis
- Work closely with global teams and external clients
- Adhere to laboratory management process and procedures in conducting day-to-day activities
