

About Marvell

Essential technology, done right™

At Marvell, we believe that infrastructure powers progress. That execution is as essential as innovation. That better collaboration builds better technology.

Focused and determined, we unite behind your goals as our own. We leverage our unrivaled portfolio of data infrastructure semiconductor technology to identify the best solution for your unique needs. And we

sit shoulder-to-shoulder with your teams to build it. Agile in our thinking, and our partnerships, we look for unexpected connections that deliver a competitive edge and reveal new opportunities. At Marvell, we're driven by the belief that how we do things matters just as much as what we do.

That's why, at Marvell, we go all in with you. Because, with a foundation built on partnership, anything is possible.

Our Unique Value

Data infrastructure technology that keeps the world running. Your partnership is what powers it.

Better partnerships lead to better technologies. Across Marvell, our work and partnerships are based on four principles.

Reliable results: we deliver what we promise; know what to expect so you can prioritize what's next

Superior performance: we believe that dynamic perspectives create the smartest path; cross-functional collaboration leads to greater consistency and higher velocity

Nimble dexterity: we listen, learn and adapt; our thoroughness and flexibility cut delays and quality issues

Rigorous execution: we work shoulder-to-shoulder to lead the charge; aligned teams work smarter to get the job done right every time

Elevator Pitch

Trusted by the world's leading technology companies for 25 years, we move, store, process and secure the world's data with semiconductor solutions designed for our customers' current needs and future ambitions. Through a process of deep collaboration and transparency, we're ultimately changing the way tomorrow's enterprise, cloud, automotive, and carrier architectures transform—for the better.

Our Markets

Carrier – Accelerating the Next Billion Connections

Explosive mobile data growth is driving carriers to re-architect their infrastructure to distributed smart 5G architectures, increasing capabilities, performance and density while lowering total costs. Marvell's compute, security and networking platform solutions offer

a unique combination of programmability, scalability and performance to enable carriers innovate in this frontier.

Enterprise – Engaging the Borderless Campus

Mobility and cloud have enabled a borderless enterprise and put enormous stress on the IT organizations working to manage it. Reliably delivering high-performance bandwidth with security and analytics is now critical. Marvell's networking, security, compute and storage portfolio delivers the innovative intelligence technologies needed to tackle the growing borderless campus.

Automotive – Driving a Safer Future

Modern vehicles are becoming mobile data centers. Advanced emerging features such as collision detection, lane departure warnings, and autonomous driving require massive amounts of secure data processing, networking and storage. Working closely with leading automotive manufacturers and technology partners, Marvell is delivering automotive chipset innovations for a safer future.

Data Center – Scaling Securely and Efficiently

As data centers transcend location with increasing numbers of customers and applications, it is critical that data infrastructure be optimized for scaling securely and efficiently. Marvell's broad storage, compute, security and networking portfolio offer best-in-class building blocks and architectures to tackle your infrastructure needs with optimal total cost of ownership.

Fast Facts

- **25 years of innovation, founded in 1995**
- **\$2.7 billion annual revenue in FY20**
- **5,000+ employees**
- **Headquartered in Santa Clara, California**
- **Research and development centers: US, Israel, India, Germany, China**
