

A global healthcare company with a history of working to make a difference for more than a century.

For more than a century, MSD has been inventing for life, bringing forward medicines and vaccines for many of the world's most challenging diseases. Today, MSD continues to be at the forefront of research to deliver innovative health solutions and advance the prevention and treatment of diseases that threaten people and animals around the world.

We are inspired by a shared vision.

To make a difference in the lives of people globally through our innovative medicines, vaccines and animal health products.

We are committed to being the premier, research-intensive biopharmaceutical company and are dedicated to providing leading innovations and solutions for today and the future.

A mission to save and improve lives.

To discover, develop and provide innovative products and services that save and improve lives around the world.

MSD

SINGAPORE IT HUB

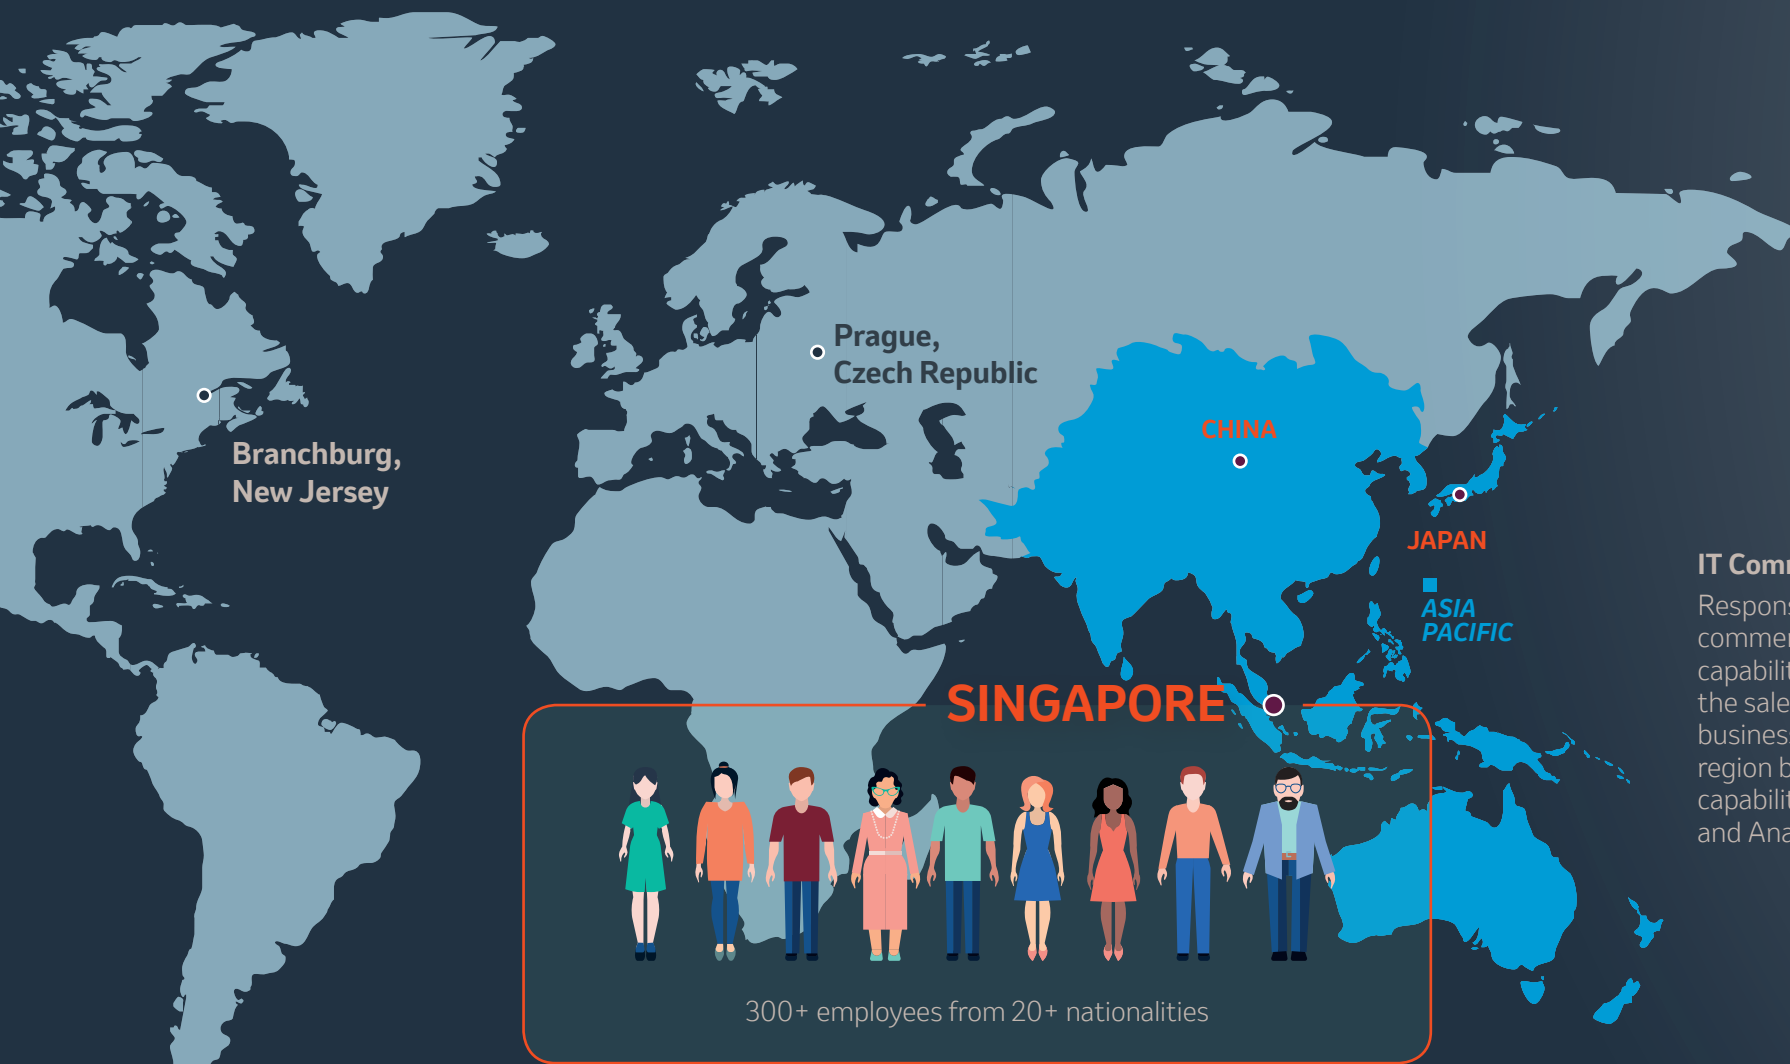

Welcome to a world where healthcare, life sciences and technology meet.

Established in Singapore in 2015, the MSD Singapore IT Hub aims to harness digital innovation for better healthcare outcomes. The hub enables the company to use analytics and mathematical modelling to guide its research focus and choices, for instance, predicting how vaccinations can reduce outbreaks and forecasting which diseases may develop into significant problems 20 years from now.

3-HUB NETWORK

Home to more than 300 employees from over 20 nationalities, the Singapore IT Hub is part of a three-hub, global network. Our other IT hubs are located in Branchburg, New Jersey and Prague, Czech Republic.

Across Japan, China and the Asia Pacific region, we support the invention of novel medicines, broaden access to medicine to the people who need it, and enable care through technology. We engage with like-minded tech minds from across the network, academia, start-ups and healthcare community to develop life-saving solutions that will drive the core business of our company.

Our expertise

Data Science

Creates value from data using advanced methods and raising the level of data literacy to bring a competitive advantage to the company.

Enterprise Platforms

Ensures consistent access and delivery of data (end-to-end) as meaningful and valuable information, for users to execute on business needs.

IT Commercial Capabilities

Responsible for deploying commercial platform capabilities to support the sales and marketing business functions in the region by deploying key capabilities in CRM, Digital and Analytics platforms.

Infrastructure, Client Computing & Network

Responsible for end-to-end infrastructure services and end-user support, while providing collaboration tools to drive productivity for employees across the organization.

Software Engineering and Design Thinking

Helps build the future of healthcare through design thinking and digital services in addition to effective medicines.

Cybersecurity and IT Risk Management

Ensures compliance and enhances the security of information and systems, as well as improving regulatory readiness across IT.

Asia Pacific Human Health Division IT

Focusing on the company's commercial digital transformation agenda, the team manages all IT systems and lead technology-driven programs that help augment commercial capabilities and provide insights, further improving the company's engagement with customers and patients.
