# We are TÜV SÜD

We transform innovation into progress and add value to everyday life for people all over the world.

TÜV SÜD is a trusted partner of choice for safety, security and sustainability solutions. We test, inspect, audit and certify thousands of products and services. We support companies to transform innovation into progress. We anticipate technological developments and facilitate change – defining standards and going beyond regulatory compliance.

Our tasks are far more diverse than most people think. We cover a wide spectrum of industries and areas of expertise. Did you know that we inspect mountain railways, certify climate protection projects and data security in e-commerce and test toys and food?

At TÜV SÜD, we are passionate about what we do. We make a difference to people's lives and society as a whole.

We do not just dream about the future, we shape it.

Become a part of the future and explore a whole world of opportunities waiting for you at TÜV SÜD.

■ Countries in which TÜV SÜD operates  
📍 TÜV SÜD Regional Center

At TÜV SÜD, more than 25,000 colleagues work together for a safer and more sustainable world. Since our beginnings 150 years ago, we have grown constantly. Today, we work with customers in over 1000 locations.

Our colleagues across the globe have inspected, tested, consulted and advised, and issued certificates for approximately 574,000 products, services and systems to date. Our global footprint and industry experience enable us to set the benchmark for international standards.

What TÜV SÜD shares with the world is why we take pride in our decisions being based on expertise. We are impartial and independent.

# The Future in your Hands

At TÜV SÜD you work in an environment that inspires you and helps you succeed in your career.

## You ignite your passion for technology

Innovations and high-end technology are your daily business. With our customers, you work on all kinds of challenges and keep track of what is happening in your industry. On top of ensuring safety for existing technologies, you drive progress and help pave the way for innovations that can be trusted. Often, you are one of the first people to evaluate and optimise new technologies.

In my job, I am mainly involved in the testing and certification of pressure components for compressed natural gas (CNG) and compressed hydrogen (GH2) fuel vehicles. I enjoy working in the alternative fuels sector as it is a constantly evolving market and the technology is getting better every year. I think the alternative fuel industry will mature to a point where it will eventually become a commodity. However, I think our involvement at TÜV SÜD will always be needed to ensure that the pressurised components remain safe for the end user."

Andre Fregeau  
Manager Industrial Technical Inspection Services  
Americas

Getting to interact with products that are unique and not accessible to everyone is definitely one of the things I enjoy most about working for TÜV SÜD. The products and equipment we work with are mostly unreleased, state-of-the-art samples which are very interesting. My job allows me to strip down the equipment, get up close and personal with the devices and discover how they work. I ask questions that help satisfy my curiosity – all while getting paid!"

Wei Yee Yeoh  
Engineer in the Electrical Safety Department  
Singapore

You strengthen your professional excellence

As a TÜV SÜD expert, your decisions matter, and we support you to make the right ones. You always have the opportunity to exchange with highly skilled colleagues from varied fields of expertise. They open new perspectives and share their knowledge, promoting your professional growth. With a broad variety of jobs, tasks and personal training opportunities, TÜV SÜD offers you a choice for every stage of your career. Whether you want to deepen your experience within a specific area or if you want to expand your knowledge on a new project, in another country, or with a new client.

I enjoy working in the field of renewable energies out of personal conviction – I can make a contribution to a sustainable future. My job is very varied; quality assurance is just as much a part of it as customer meetings, visits to trade fairs and conferences and the professional development of my team. The development of young employees especially is a great and rewarding task. My role is also about opening up new fields of activity, winning new customers and thus optimally positioning ourselves and TÜV SÜD for the future.”

Stephan Mayer  
Head of Tower, Foundation and Internals for Wind Turbines  
Germany

At TÜV SÜD, I organise and manage projects to inspect, assess and approve new rail systems. In our team, we often have professional and personal discussions over a coffee in our “ICE kitchen” – a kitchen we built from an ICE in our lounge. If a complex technical question arises, the other experts are always ready to listen and give advice. In comparison to my previous employment, I can gain a much broader technical understanding at TÜV SÜD and get to know solutions from different manufacturers.”

Dominik Pröbstl  
Assessor Rail Vehicle Technology  
Germany

# You leave a mark

Your work at TÜV SÜD has an impact and makes a difference for society. You help make the lives of many people safer and more sustainable. You are part of a team that shares your values: fairness, honesty and transparency in every situation and with everybody you encounter. You never stop questioning the status-quo.

It's a job like no other! I advise clients and deliver solutions to secure customer and payment data for their online businesses. Due to the dynamics of this sector, my work can even take me to businesses based in major cities like London or Paris. The fact that TÜV SÜD is well recognised and highly trusted in the IT security sector pushes us to make sure we are one step ahead in providing quality and up-to-date service to clients."

Sharon Lundgren  
Product Specialist for E-Commerce Certifications  
Germany

I work with my team and external partners such as the government to develop and implement procedures for inspecting road vehicles. It is our responsibility to foresee and detect vehicle defects and avoid accidents and environmental damage. I genuinely feel that in some way, we save lives, and this inspires me to work harder and better."

Juan Portillo  
Technical Director  
Spain

# Versatile, surprising, challenging – your field of expertise at TÜV SÜD

## When will you join TÜV SÜD?

There is a constantly evolving variety of job profiles in all of TÜV SÜD's professional fields. Depending on your qualifications and interests, you could join us as a technical expert, test engineer or analyst, inspection

specialist, auditing and certification specialist, business support specialist or as many other roles. Check out our industry areas below and how they match with your skills and expertise.

### Automotive and Traffic Safety

In Automotive and Traffic Safety, your job is to ensure road safety for today and tomorrow. You also help advance the development of new technologies such as autonomous driving or alternative fuels. Your colleagues' backgrounds are as unique as the jobs themselves. However, they all usually have a background in engineering, mechanics or physics and several years' experience within the industry, (e.g. at manufacturers).

### Industrial Plants, Energy and Environmental Technology

As an expert with TÜV SÜD, you test, evaluate and certify the quality of industrial plants, including their energy consumption and power generation, to ensure their safety and sustainability. Join us with a degree in engineering, physics or chemistry, and years of relevant experience or with a similar background.

### Real Estate and Building Technology

To ensure safe living and working spaces, you are the expert who checks and confirms building safety measures along and performs real estate surveys and evaluations. Join us with a degree in Real Estate Management or engineering plus background in the industry.

### IT, IT Security and Automation

You safeguard companies' critical data, have expertise in IT architectures and are knowledgeable in complex automation technology and software systems such as SAP to strengthen data security. Ideally, you have relevant job experience in IT security or SAP programming with an IT-related degree.

### Manufacturing, Consumer Products and Food

Through testing and audits, you make sure industrial and consumer goods, including food and beverages such as drinking water, are of the highest quality and safe for the end customer. A fitting background would be, for example, a degree in engineering with experience in food technology, chemistry or nutritional science.

### Medical Devices and Healthcare

You help develop the future of healthcare by certifying medical products and auditing manufacturers and companies within the health sector. Join us with a degree in Medical Technology or similar with relevant industry experience.

### Railway, Transportation Systems and Amusement Rides

You ensure the quality of public vehicles and amusement park facilities to provide the highest level of safety. An example background would be an engineering degree with business experience.

### Corporate Functions and Business Support

You manage a strategic or operative role within HR, finance, marketing, controlling or law. Your background would be a degree in business studies, law, psychology or a similar field of study with relevant business experience.

### Sales, Customer Services and Training Management

You are in direct contact with our clients and work with a high degree of personal responsibility. Tasks could include reviewing contracts and related risks, developing new concepts for training and consulting approaches and much more. Possible backgrounds are a degree in business studies, law, psychology or a similar field of study with relevant business experience.

# Working for TÜV SÜD: Discover a world of opportunities

## Achieving your highest potential at TÜV SÜD

TÜV SÜD's success is based upon the excellence of our employees. You hold the key to defining your career at TÜV SÜD, and we will support you on your way with the tools to advance your career.

### Training

We offer consistent and up-to-date training and development opportunities to sharpen your expertise and prepare you for future challenges.

### Work-Life Harmony

We recognise the importance of work-life balance and have programmes in place that make this a reality for all employee groups.

### Remuneration

We provide market-orientated pay and rewards measured against performance, contribution and abilities.

### Performance Management

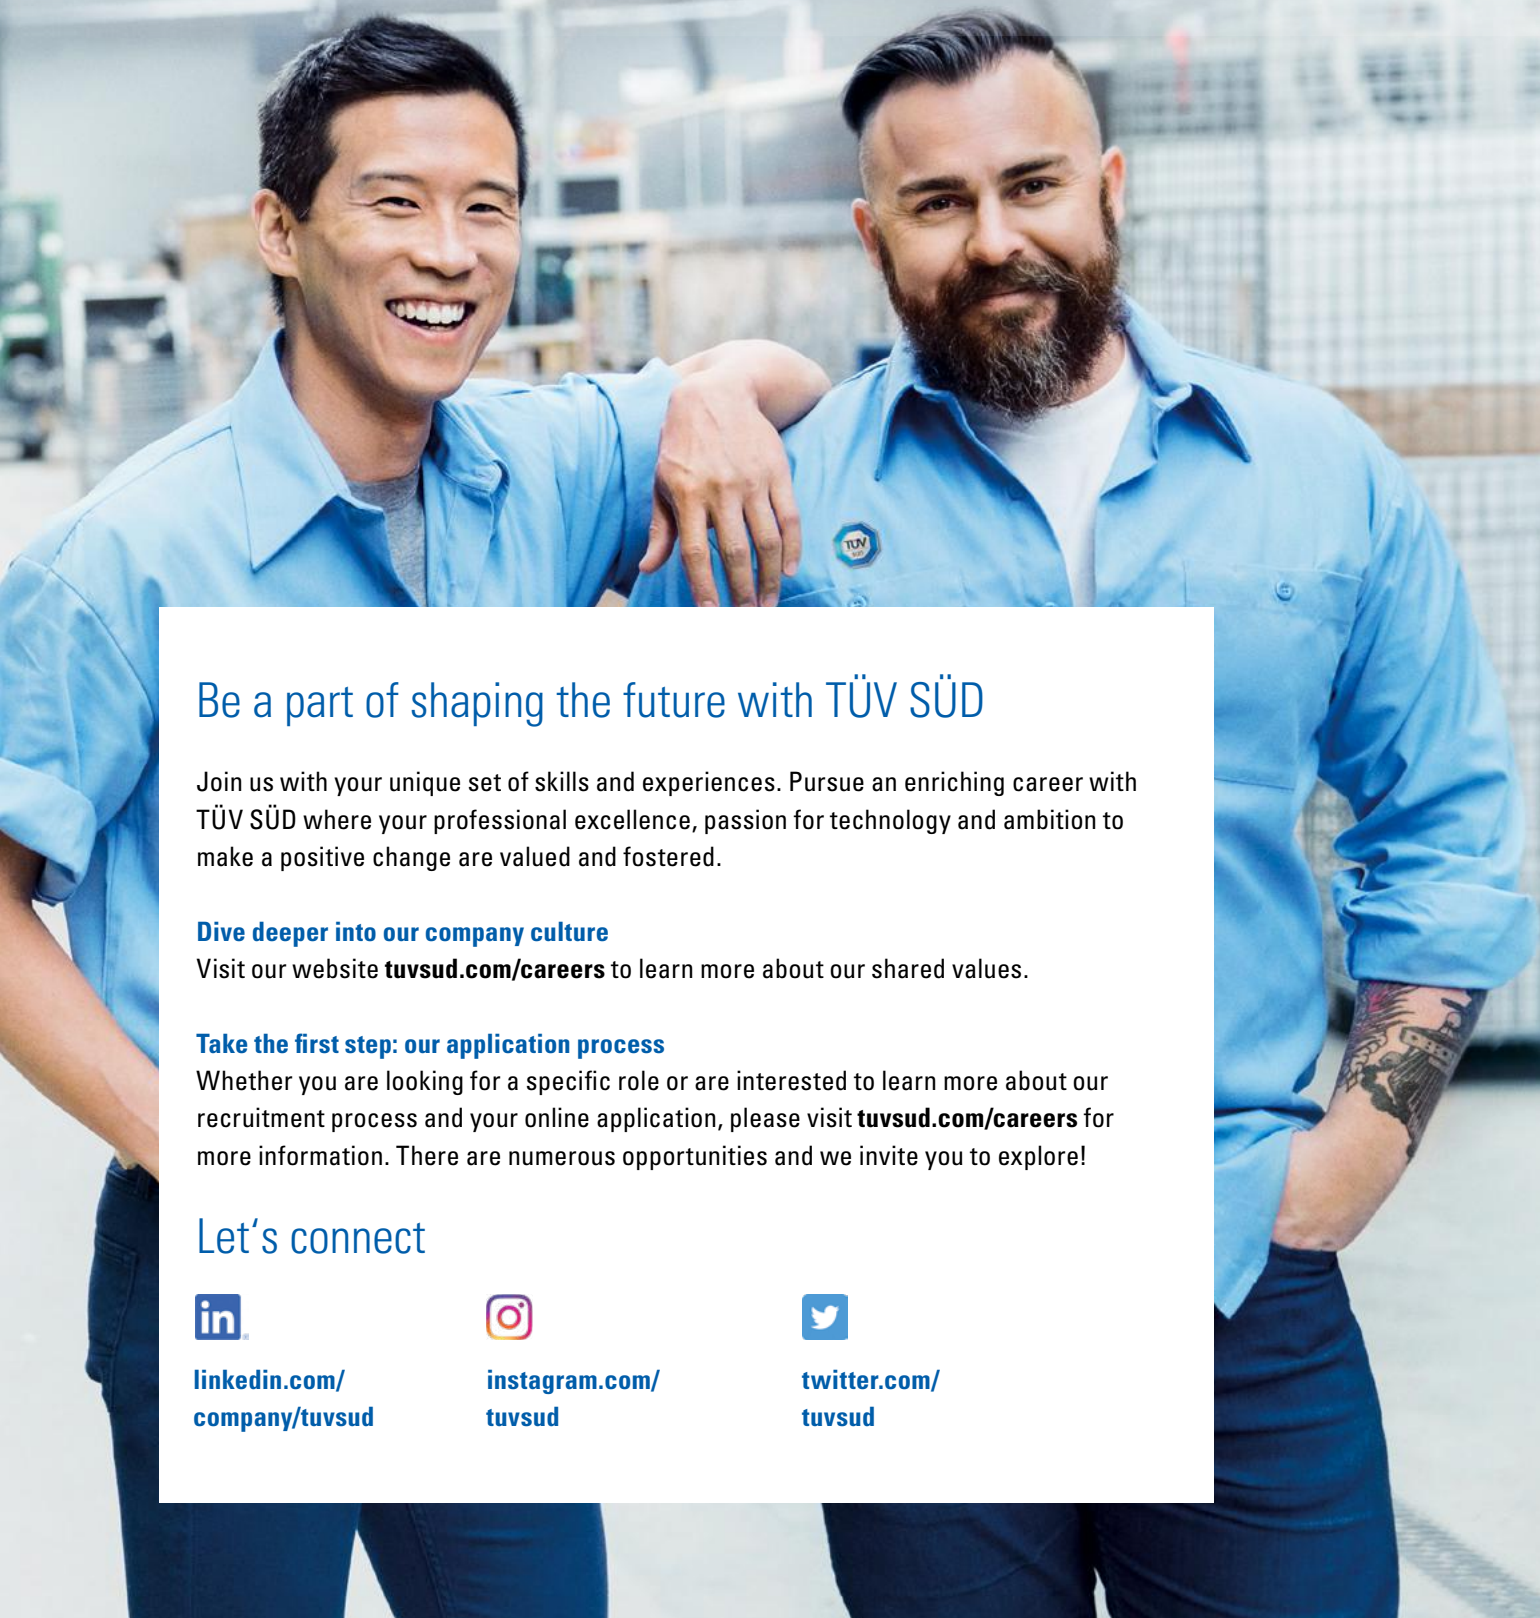

We believe in organised channels and systems to measure performance and motivate open communication within teams.

### Purpose

We make a real, tangible difference in the world and in people's lives. With TÜV SÜD you are part of a team that makes the world a safer and more sustainable place.

# Join our team – close to home or worldwide
