We are seeking highly motivated **Software Interns** to help in achieving our goals. Intern positions are available in multiple teams including:

- Maps Applications
- Fleet Management Applications
- Services and Infrastructure
- DevOps

If you are a high achieving computer science student (BSc, MSc track) who is looking to change the world through software, this is the place for you. Please include a cover letter to let us know when you are looking to intern with us. **Please note that it will be in our Singapore office, and we would expect a minimum 12 weeks internship period from all interns**.

If you are interested in internships for Summer/Fall/Winter 2020 (May 2020 onward) - please look out for the next round of applications that will start in January 2021.

What you'll be doing:

- General purpose programming languages: C++, C#, Go, and Python etc
- Web technologies: JavaScript, TypeScript, HTML, CSS, Node, Angular, React, Relational Databases, NoSQL Databases, AWS Services
- Tools: Travis, Drone, Jenkins, Docker, Github, bash, CMake, NPM, webhooks
- Familiarity with building and deploying scalable systems on cloud providers (AWS, GCP, Azure)
- Passionate about building scalable and maintainable systems
