Want to work as a

Software Developer?

Use Java, C++ or C# to design and develop applications that are fundamental to daily business operations.

What you need

- Bachelor's degree or higher in a Technology, Engineering, Science or Maths-related discipline
- 3.2 GPA or higher
- Desire to learn new skills and apply them in Financial Services or a tech company
- Passion for programming and problem solving

m_three_

Software Development

Use the team's technology of choice to design and develop complex applications in a dynamic global team environment.

Most commonly using Java, C++ and C#; software developers work with stakeholders across the business to create, test and improve applications which play a fundamental role in the organisation's daily operations.
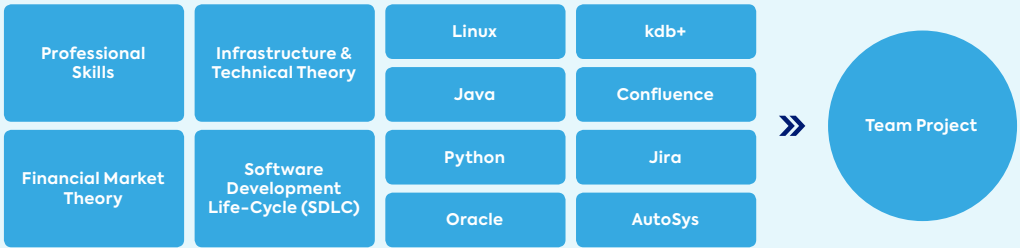

They are involved throughout the software development lifecycle, from design and testing to support and maintenance while following an Agile methodology to achieve better results.

With senior colleagues on hand to offer advice and a fresh pair of eyes on code, you'll quickly learn, progress and take on more responsibilities in your role.

After you complete our training programme, you could go on to work as an Alumni for an mthree global banking or tech client.

Training Programme Modules

Professional Skills	Infrastructure & Technical Theory	Linux	kdb+	
		Java	Confluence	
Financial Market Theory	Software Development Life-Cycle (SDLC)	Python	Jira	Team Project
